

Half-and-Half Embossed Card with Mixed Designs

UN PROYECTO DE NUESTRO PROGRAMA EN DIRECTO - CREATE AND CRAFT SHOW 11TH MAR 23 - 11 MARCH 2023...

SOBRE ESTE PROYECTO

Create an elegant card featuring a striking half-and-half embossed design. The top section showcases delicate beaded hearts whilst the bottom displays romantic dripping hearts, all embossed on white card stock and embellished with decorative patterned paper, a gold strip, floral die-cuts, and glitter accents. This technique demonstrates how to combine two different embossing folder designs on a single piece to create a unique layered effect.

PASO A PASO

1

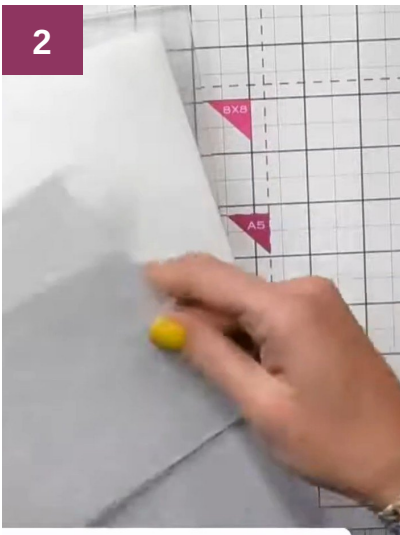

PASO 1 DE 6

Place your card stock into the first embossing folder (beaded hearts design) and position it so that only the top half of the card will be embossed. Ensure the card is aligned properly within the folder before closing.

2

PASO 2 DE 6

Run the folded card through your die-cutting machine with the embossing folder, positioning it so that only half of the card is embossed. This creates a split design effect on your card.

3

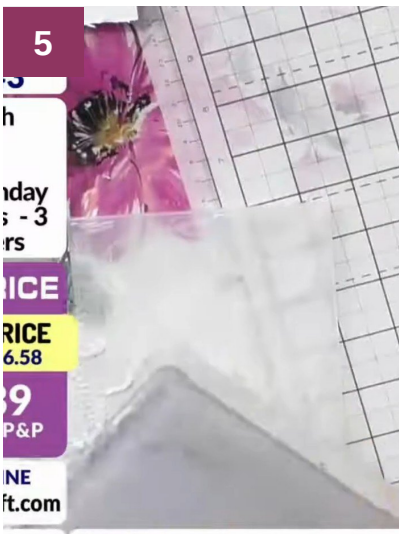

PASO 3 DE 6

Remove the embossed card from the first folder and place it into the second embossing folder (dripping hearts design), positioning the bottom half of the card to be embossed. Run through the die-cutting machine.

**PASO 4 DE 6**

Place the card with the embossed dripping hearts design onto the cutting mat and run it through the die-cutting machine to emboss the bottom half of the card.

[VER ESTE PASO - 38:15](#)**PASO 5 DE 6**

Remove the card from the embossing folder and carefully check both embossed sections to ensure the design has transferred clearly and evenly across the card.

[VER ESTE PASO - 38:30](#)**PASO 6 DE 6**

Mount the completed embossed card onto a card base. Hide the join line between the two embossed designs by placing a decorative element such as a ribbon, die-cut flowers, or embellishments across the centre.

CONSEJOS DEL PROGRAMA

- You can create half-and-half designs with any embossing folders to add variety to your cards.
- Hiding the join line with a banner, sentiment, or die-cut element makes the design look intentional and professional.
