2

### PASO 2 DE 9

3

### PASO 3 DE 9

## PASO 9 DE 9

Allow the card to cool completely before handling to ensure the heat embossed design sets permanently.

## CONSEJOS DEL PROGRAMA

- Get your heat gun hot as possible first; less time on the card means less cockle, lumps and bumps in the finished piece.
- Use an anti-static bag before stamping to prepare your card stock and improve the crispness of your embossing.
- Once powder is on the stamped image, it does not matter when you heat set it—you can leave it sitting and heat set it later.
