

Stencilled Beer Bottle Card with Embossing

UN PROYECTO DE NUESTRO PROGRAMA EN DIRECTO - HOBBYMAKER TV - 29 DE ENERO DE 2026

EL PROYECTO TERMINADO

SOBRE ESTE PROYECTO

Create a sophisticated beer bottle design using layered stencils and stamps to build depth and dimension. This technique produces a realistic, screen-printed effect with light and shadow that looks professional and gallery-worthy. The finished card features beautiful watercolour-style bees and florals in natural tones of yellow, green and cream.

PASO A PASO

PASO 1 DE 9

Position your beer bottle stencil on white card stock. Using a blending tool or sponge, apply purple ink through the stencil, working from the edges inward to create depth and shading on the bottle shapes.

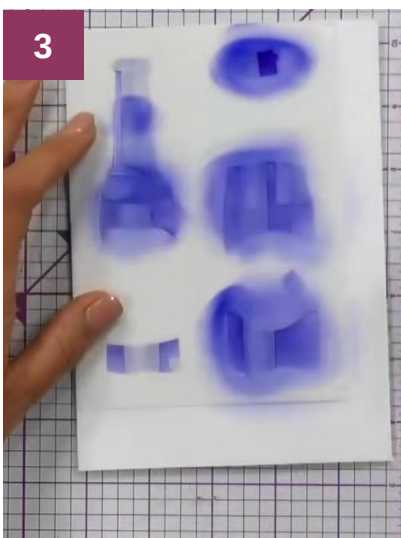

[VER ESTE PASO - 15:15](#)

PASO 2 DE 9

Position the second stencil over the first, carefully aligning the registration marks at the top and left edges. Apply purple ink through the stencil to add additional detail and dimension to the bottle design.

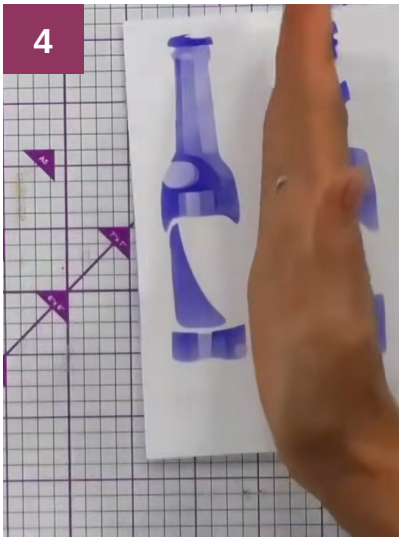

[VER ESTE PASO - 15:30](#)

PASO 3 DE 9

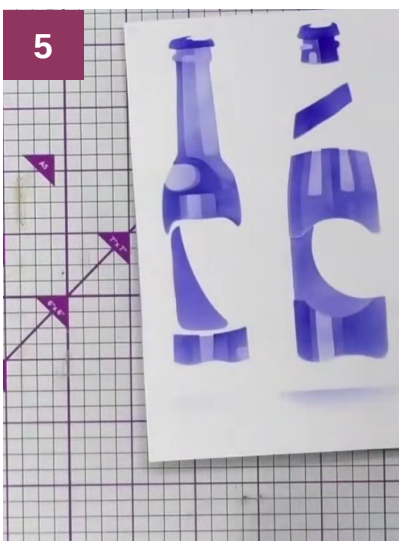

Continue layering additional stencils in sequence over the bottle area, applying purple ink through each layer. Allow each layer to build up the reflective quality and realistic appearance of the craft beer bottle.

[VER ESTE PASO - 16:30](#)

PASO 4 DE 9

Ink up your beer bottle stamp with black dye-based ink and stamp it onto the stencilled background, positioning it to complement the shaded areas you created earlier.

[VER ESTE PASO - 17:45](#)

PASO 5 DE 9

Stamp the beer bottle design a second time over the first impression to ensure all the details are clear and crisp. This will give you a bold, well-defined image ready for embossing.

[VER ESTE PASO - 18:00](#)

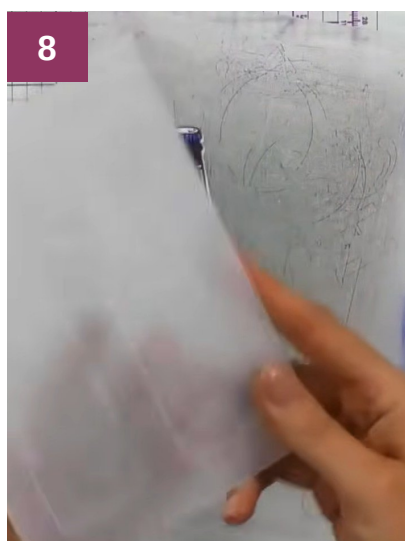

PASO 6 DE 9

Use the coordinating dies to cut around the stamped beer bottle designs. Carefully cut out the outline shapes to create your die-cut bottle embellishments.

[VER ESTE PASO - 21:00](#)

**PASO 7 DE 9**

Place your die-cut craft beer bottle into the embossing folder, ensuring it is positioned correctly with the raised side facing up.

[VER ESTE PASO - 22:45](#)**PASO 8 DE 9**

Place your stamped card front into the embossing folder and run it through your die-cutting machine to add embossed detail and dimension to the bottle cap and label areas.

[VER ESTE PASO - 23:00](#)**PASO 9 DE 9**

Turn the embossed piece over to check that the detail has been pushed through properly, creating a raised dimensional effect on the reverse side.

[VER ESTE PASO - 23:30](#)

CONSEJOS DEL PROGRAMA

- Use dye-based inks rather than pigment inks for better depth and dimension, as they dry more quickly.
- If you are making multiple cards, complete all stencilling on several cards first, then all stamping, then all die-cutting and embossing for efficiency.
- You can use brown or gold embossing powder on the stamps for a vintage look instead of black ink.
