PASO 3 DE 10

Carefully align and stamp the second layer of the flower design over the coloured base, matching the detail to the watercoloured areas beneath. Press firmly to ensure a clear impression.

CONSEJOS DEL PROGRAMA

- If using normal card stock instead of watercolour card stock, the ink will dry very quickly, so work fast when blending colours.
- The lamination system is forgiving with alignment—slight misalignment still looks artistic and sketch-like rather than precise.
- You can use different ink pad colours for the base layer; the watercolour effect works with any colour choice.
