Tarjeta con crisantemo en 3D

UN PROYECTO DE NUESTRO PROGRAMA EN DIRECTO - HOBBYMAKER TV - 9 DE DICIEMBRE DE 2025

EL PROYECTO TERMINADO

SOBRE ESTE PROYECTO

Create a stunning 3D chrysanthemum flower card using pre-shaded die-cut petals in soft pink and cream tones on a kraft background. The flowers are double-sided with shading on both front and back, allowing you to build dimensional blooms quickly and easily without any colouring required. This elegant floral design combines layering and dimensional techniques to create a beautiful handmade card.

NECESITARÁS

- Stamps By Me - Floral Dimensions...

PASO A PASO

PASO 1 DE 7

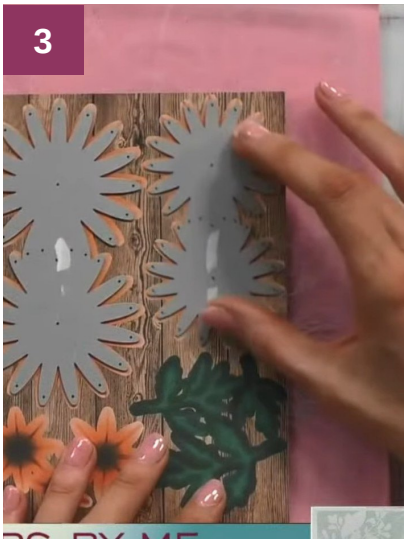
Position the grey die-cut flower shape onto the pre-printed wood-effect card with orange chrysanthemum flowers, ensuring the die aligns properly with the printed design.

VER ESTE PASO - 27:45

PASO 2 DE 7

Position the die-cut chrysanthemum pieces on the wood-effect card base. If the die doesn't align properly, flip the card stock over to use the reverse side, as the dies are double-sided but not symmetrical.

VER ESTE PASO - 28:00



PASO 3 DE 7

Run the die and card stock through your die-cutting machine. The grey die-cut flower shapes will be released from the woodgrain patterned card stock, along with the orange and green decorative elements.

VER ESTE PASO - 28:15

PASO 4 DE 7

Pop out the cut flower pieces from the die-cut card using a pokey tool. Carefully remove the grey chrysanthemum shapes and the smaller orange and white flower pieces from the backing.

VER ESTE PASO - 28:30

PASO 5 DE 7

Select die-cut chrysanthemum pieces in different sizes. Layer them together on your card, choosing either the light or dark shaded side as desired. Position the green foliage pieces at the bottom with the flowers above.

VER ESTE PASO - 28:45

PASO 6 DE 7

Layer the die-cut chrysanthemum flowers together using dry clear glue, building up dimension by stacking the grey petals on the wood-effect background. Add the green foliage layer and smaller flower elements to create a 3D floral arrangement.

VER ESTE PASO - 29:00

PASO 7 DE 7

If desired, gently shape the petals with your fingers or use ball tools to create a more dimensional effect on your chrysanthemum flowers.

VER ESTE PASO - 29:15

CONSEJOS DEL PROGRAMA

- The card stock is thicker than traditional, allowing you to score and fold petals for sideways 3D flowers as well as flat blooms.
- You get multiple sizes on the plates, so you can build flowers at different scales.
- The double-sided shading means you can choose which colour tone to display on each petal.
