EL PROYECTO TERMINADO

SOBRE ESTE PROYECTO

Create a sophisticated layered card using only foliage die-cuts, without any flowers. This elegant design features various leaf and branch elements in black, white, cream and gold tones, arranged over an embossed background with a central sentiment. The main techniques include die-cutting foliage shapes, layering dimensional elements, and combining embossing with inky backgrounds for depth and texture.

PASO 4 DE 6

Die-cut the foliage elements from the Foliage Banners dies in different colours of cardstock. Cut the rectangular frame and circle frame with their foliage decorations, as well as additional leaf sprigs to layer and arrange on your card.

VER ESTE PASO - 40:15

PASO 5 DE 6

Glue the foliage pieces onto the card using dry clear glue. Layer the black and pink die-cut foliage elements over the stamped background, building up dimension. Position a white label panel at the bottom of the card.

VER ESTE PASO - 40:30

PASO 6 DE 6

Optional: trim larger foliage pieces into smaller elements to create multiple design components. This allows you to use parts of the die-cut foliage separately for more flexible placement on your card.

CONSEJOS DEL PROGRAMA

- The extended and elongated leaves can be trimmed to create two different designs from one cut piece.
- Foliage dies are versatile and work well with any colour scheme, not just florals.
- These dies are some of the hardest-working in your collection and will be used repeatedly.
