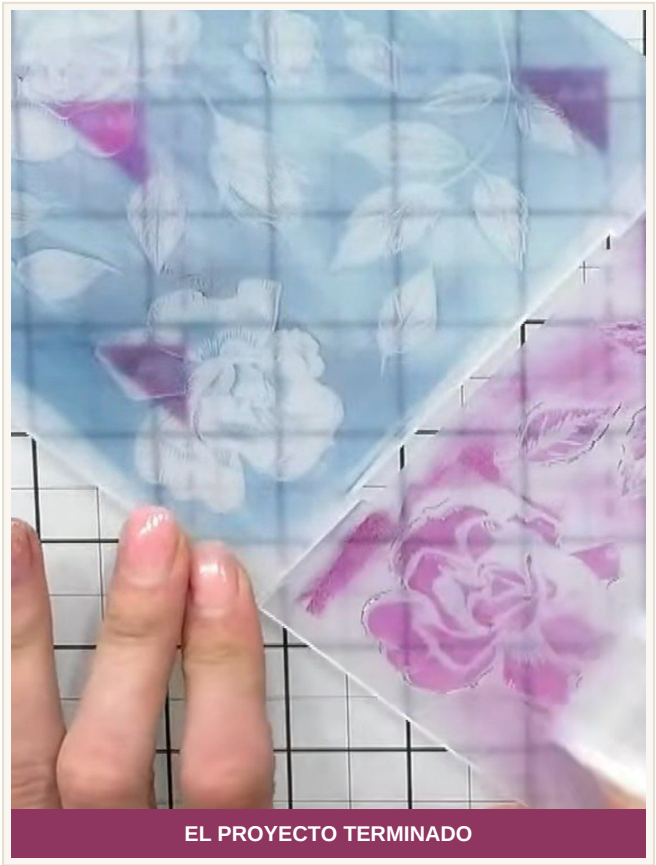
Dual-Coloured Embossed Card with Ink Pad Technique

UN PROYECTO DE NUESTRO PROGRAMA EN DIRECTO - CREATE AND CRAFT TV - 23 DE MAYO DE 2023



EL PROYECTO TERMINADO

SOBRE ESTE PROYECTO

Create a striking card featuring dual-coloured embossed flowers in pink and blue tones. This elegant design is achieved by inking both sides of an embossing folder with different colours before running it through your die-cutting machine, producing a beautiful two-toned effect. The technique allows you to showcase either the raised or recessed side of the embossing, giving you creative flexibility in your finished piece.

PASO 2 DE 8

Apply your first ink colour (such as teal) to one side of the embossing folder by swiping the ink pad across the raised areas. Ensure all the embossed details are covered with ink.

PASO 3 DE 8

Lightly spray the inked embossing folder with water using a spray bottle for a softer, watercolour effect. The water will help blend the pink and blue inks on the folder.

PASO 4 DE 8

Flip the embossing folder over to the reverse side. Swipe a purple or contrasting colour ink pad across the surface of the folder to add colour to the other side of the design.

VER ESTE PASO - 51:30

PASO 5 DE 8

Insert a piece of white card stock into the inked embossing folder, positioning it between the two halves of the folder.

VER ESTE PASO - 51:45

PASO 6 DE 8

Place your inked card into the embossing folder and run it through your die-cutting machine on the appropriate setting to create the raised floral design.

VER ESTE PASO - 52:00

PASO 7 DE 8

Remove the embossed card from the folder and trim it to your desired size using a trimmer or scissors.

VER ESTE PASO - 52:15

PASO 8 DE 8

Decide which side of your embossed panel you prefer - the raised embossed side or the debossed side. Mount your chosen side onto your card base to complete your dual-coloured embossed card.

CONSEJOS DEL PROGRAMA

- You can choose to display either the embossed or debossed side depending on which colour and effect you prefer.
- If you don't like the result, you can run the card back through the folder to refresh the embossing.
- This technique works beautifully for creating wreath designs where you can see detail from both front and back.
