CONSIGLI DALLA PUNTATA

- The stamp cleaning cloth has a textured side for getting into nooks and crannies on stamps, and a smooth side for general cleaning.
- The cloth dries out completely when stored in its tube, which prevents bacteria growth and odours; simply rehydrate with water when you need to use it again.
- You can create a coordinated set of cards by using the same stamp in different corners and with different embossing colours to keep a theme consistent.
