

Biglietto con crisantemo 3D

UN PROGETTO DALLA NOSTRA DIRETTA - HOBBYMAKER TV - 9 DICEMBRE 2025

IL PROGETTO

Create a stunning 3D chrysanthemum flower card using pre-shaded die-cut petals in soft pink and cream tones on a kraft background. The flowers are double-sided with shading on both front and back, allowing you to build dimensional blooms quickly and easily without any colouring required. This elegant floral design combines layering and dimensional techniques to create a beautiful handmade card.

Position the die-cut chrysanthemum pieces on the wood-effect card base. If the die doesn't align properly, flip the card stock over to use the reverse side, as the dies are double-sided but not symmetrical.

CONSIGLI DALLA PUNTATA

- The card stock is thicker than traditional, allowing you to score and fold petals for sideways 3D flowers as well as flat blooms.
- You get multiple sizes on the plates, so you can build flowers at different scales.
- The double-sided shading means you can choose which colour tone to display on each petal.
