IL PROGETTO FINITO

IL PROGETTO

Create a beautiful layered card featuring a delicate fern design with multi-coloured ink blending in soft greens and blues. This project shows you how to build depth with colour, add white highlights to soften darker areas, and finish with colourless glitter for an elegant glass-like shimmer effect. The result is a sophisticated botanical card perfect for any occasion.

If the colour appears too dark, remove the stencil and use a clean brush with white pigment ink to gently push back the colour and soften the effect.

CONSIGLI DALLA PUNTATA

- You can always add another colour and keep running the card through the embossing folder if you're not happy with the result.
- Colourless glitter is a game-changer and works perfectly for adding shimmer without fighting with your background colours.
- Save small pieces of vellum and paper scraps for use as banners, tabs and texture layers on card backs.
