

Pressed Flower Embossed Card with Die-Cut Elements

UN PROGETTO DALLA NOSTRA DIRETTA - CREATE AND CRAFT TV - 22 MAGGIO 2023

IL PROGETTO FINITO

IL PROGETTO

Create an elegant floral card using 3D HD embossing folders with integrated dies. This project features delicate white embossed flowers and foliage elements that can be left attached or die-cut to create dimensional layered designs. The technique combines embossing and die-cutting to produce beautiful raised floral motifs with intricate stencil details.

PASSO PASSO

1

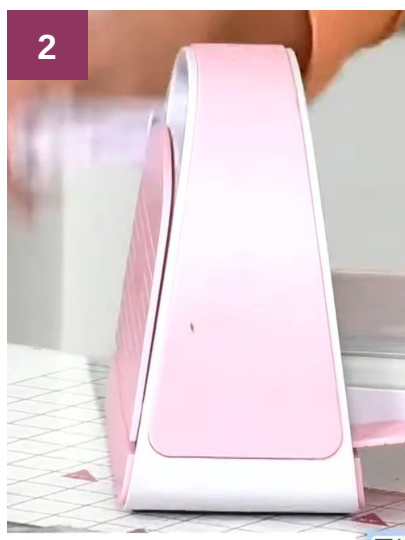

PASSAGGIO 1 DI 7

Place your white card stock into the embossing folder with the die still taped in position. Ensure the card stock is properly aligned within the folder before running it through your die-cutting machine.

2

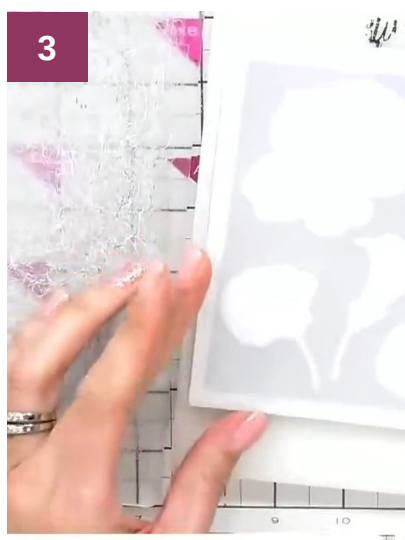

PASSAGGIO 2 DI 7

Run your embossed card through the die-cutting machine using the standard plate settings. The pink and white die-cutting machine will cut out the floral shapes from the embossed design.

3

PASSAGGIO 3 DI 7

Remove the card from the embossing folder and observe the embossed detail. The die-cut elements will still be in place within the embossed design.

CONSIGLI DALLA PUNTATA

- You can take the die out of the embossing folder by gently peeling back the low-tack tape, allowing you to use the folder as a traditional 3D embossing folder for backgrounds without cutting.
- The stencil created by the die-cut can be saved and used separately for spraying or inking techniques.
- Run multiple cards through at once and keep the embellishments in containers for quick card-making occasions.
