HET EINDRESULTAAT

OVER DIT PROJECT

Create a delicate Carolina allspice filler flower with layered petals in soft cream and burgundy tones. STAP VOOR STAP

STAP 1 VAN 9

Cut two large petal pieces, two medium petal pieces, and two small petal pieces from white cardstock using the Carolina Allspice die set. You can optionally leave a small bud uncut on each flower if desired.

STAP 2 VAN 9

Colour the front and back of all petal pieces with deep red alcohol ink. Work on a black mat to catch any excess ink. Apply the ink evenly to ensure full coverage on both sides of each petal.

STAP 3 VAN 9

Using a lighter shade of ink or chalk, add colour to the tips of the white petals to create shading and dimension. Press down gently on each petal tip to blend the colour.

STAP 4 VAN 9

Lightly mist the coloured petals with water to activate the paper. Hold each petal and spray gently to dampen the surface.

STAP 5 VAN 9

Using tweezers, pinch each white petal close to the centre to create natural curves and dimension. Work around each flower, pinching all the petals to shape them.

STAP 6 VAN 9

Cup the white petals using a small ball stylus on a moulding mat. Work gently to create a curved, dimensional shape for each petal.

[BEKIJK DEZE STAP - 48:00](#)

STAP 7 VAN 9

Assemble the flower by layering the petals, offsetting them as you go. Start with the largest pieces and glue them together, building up the layers to create dimension.

STAP 8 VAN 9

Layer the medium-sized petals on top of the large petals, then add the small petals on top, offsetting each layer slightly to create a fuller, more dimensional flower appearance.

STAP 9 VAN 9

Place the completed Carolina Allspice flower into a molding tray or foam pad to help it hold its shape whilst it dries and sets. This will ensure the petals and leaves maintain their dimensional form.

TIPS UIT DE SHOW

- Tiny flowers benefit from misting with water to help hold their shape as you work.
- Use a molding tray to set small flowers while they dry, which helps maintain their dimensional shape.
