

Psychedelische laagjesroos op witte kaart

EEN PROJECT UIT ONZE LIVESHOW - MY PODCAST - 16 MAART 2026

OVER DIT PROJECT

Create a stunning layered rose design with an artistic, psychedelic twist using a multi-step stencilling technique. This project combines vibrant pinks, oranges, and greens to produce a bold, contemporary floral image on white card. You'll use layering stencils and ink pads to build up depth and dimension, resulting in a striking modern rose that's perfect for cards or framed art.

TIPS UIT DE SHOW

- There are no rules—you can use any colour combination you like; the results will be unique each time.
- If you lose detail after adding water, allow the card to dry completely, then go back in with the stencils to re-add definition.
- You can create a monochrome effect by using only shades of grey, starting very light and building to darker tones through all five stencils.
