

Layered Mid-Century Modern Geometric Focal Point Card

EEN PROJECT UIT ONZE LIVESHOW - BRAND SHOWCASE - 4 NOVEMBER 2022

OVER DIT PROJECT

Make a bold mid-century modern card with layered geometric shapes in bright turquoise, pink, yellow and green. Using a stencil and distress oxide inks, you'll build up overlapping triangles and circles to create a striking retro-inspired focal point. Finish with a simple sentiment for a stylish, contemporary greeting card.

Add enamel dots or other embellishments to enhance your design if desired. Place them strategically on the stamped flowers or geometric shapes to add dimension and interest to your finished card.

TIPS UIT DE SHOW

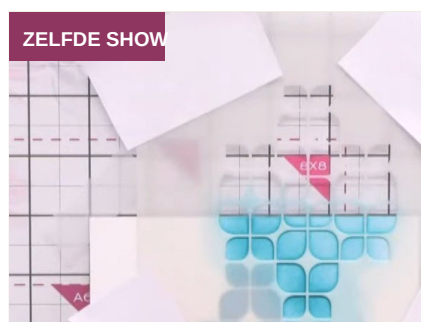

- Work in odd numbers when layering shapes—typically three shapes create a pleasing composition.
- Yellow, pink and turquoise distress oxides blend beautifully together and are good starter colours when trying a new ink brand.
- This design works particularly well for masculine cards as it keeps the design clean and graphic without excessive embellishment.
