

HD 3D Embossed Poppy Card with Metallic Ink Finish

EEN PROJECT UIT ONZE LIVESHOW - CREATE AND CRAFT - 16 SEPTEMBER 2022

HET EINDRESULTAAT

OVER DIT PROJECT

Create a stunning card featuring beautifully embossed poppies with a sophisticated metallic finish. Using HD 3D embossing folders, you'll achieve incredible depth and dimension, then enhance the raised floral design with brushed metallic ink to create an elegant, contemporary look. This technique produces a striking brushed metal effect that highlights every intricate detail of the wild bouquet.

STAP VOOR STAP

1

STAP 1 VAN 7

Place your white cardstock inside the HD 3D embossing folder, positioning it carefully to align with the poppy design.

2

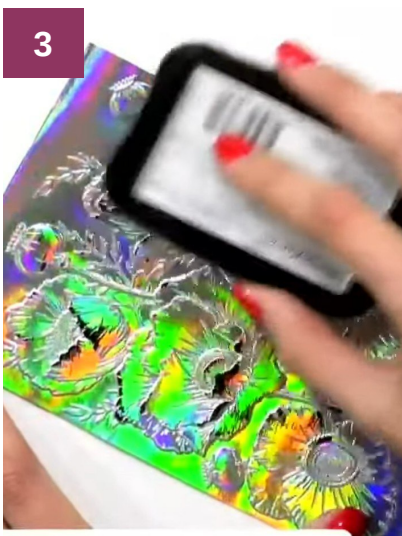

STAP 2 VAN 7

Place the embossing folder with your cardstock inside between the embossing plates. Run the folder through your die-cutting machine to create the raised 3D embossed design.

3

STAP 3 VAN 7

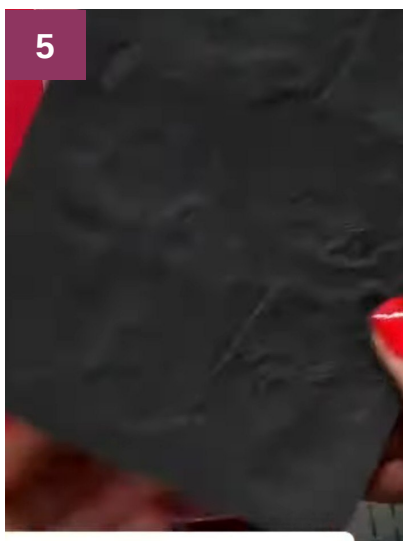

Remove the embossed cardstock from the folder and examine the raised detail on the front and the debossed detail on the reverse. Gently brush away any excess powder or debris from the surface.

STAP 4 VAN 7

Tilt the embossed holographic card towards the light to admire the incredible depth and multiple layers of detail created by the 3D embossing folder.

[BEKIJK DEZE STAP - 54:00](#)

STAP 5 VAN 7

Take a metallic or contrasting ink pad and gently brush it across the entire embossed surface of your card. This will highlight the raised areas of the embossing and add dimension to your design.

[BEKIJK DEZE STAP - 54:30](#)

STAP 6 VAN 7

Lightly brush the surfboard ink pad over the raised embossed areas of the black card. Allow the ink to catch only the raised surfaces to create a brushed metallic or etched appearance on the poppy design.

7

STAP 7 VAN 7

Gently wipe away any excess ink from the embossed card surface to enhance the contrast between the raised and recessed areas of the design.

TIPS UIT DE SHOW

- Experiment with different cardstock colours and finishes—pearl, metallics, whites and blacks all produce different effects.
- Use a metallic or restrictive ink pad to pick up the rise and fall for a brushed metal finish.
- The HD 3D embossing folder creates up to nine layers of detail, giving exceptional depth compared to standard 3D folders.
