## STAP 8 VAN 8

Allow the paste to dry naturally for three to five minutes, or use a heat gun to speed up the drying process and reveal the full sparkle.

## TIPS UIT DE SHOW

- You do not need a heat gun to dry the paste—it will dry naturally in the air, the heat gun simply speeds up the process.
- Clean your stencil straight away by placing it in water; the paste comes off easily with a gentle rub.
- The colours appear pale in the pot but become much brighter and more glittery once the glue dries clear.
