Rolled Rose Flower from Stencil Elements

EEN PROJECT UIT ONZE LIVESHOW - BRAND SHOWCASE IN THE HTCN STUDIOS - 25 FEBRUARI 2022

OVER DIT PROJECT

Build a dimensional rose by folding and wrapping propeller elements from the stencil around each other, starting with a tight bud in the centre and gradually opening the petals outward. This creates a realistic, layered rose focal point.

- You can create roses in multiple sizes using different propeller elements from the same stencil.
- Small roses made by snipping and folding work beautifully as steppers or accent flowers on cards.
