

Embossed Card Using Layering Stencils and Ink

EEN PROJECT UIT ONZE LIVESHOW - IDEAL WORLD - 21 MEI 2025

OVER DIT PROJECT

Create a beautiful embossed card featuring delicate floral designs in soft pink and purple tones. Using numbered layering stencils and coloured ink pads, you'll build up a detailed, dimensional image with professional results. This technique combines stencilling, embossing and layering to achieve a sophisticated, textured finish perfect for special occasion cards.

STAP VOOR STAP

1

STAP 1 VAN 7

Position layering stencil number one in the corner of your card blank on the magnetic glass mat.

2

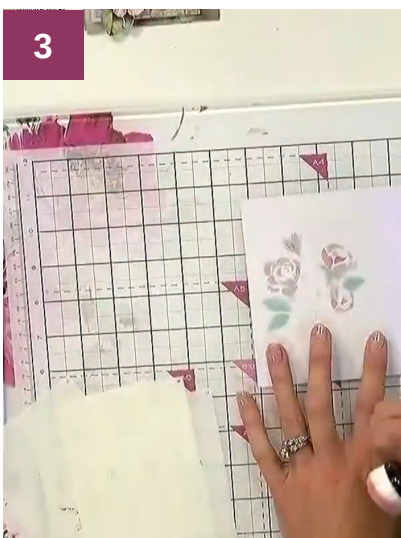

STAP 2 VAN 7

Use a blending brush to apply coloured ink through the layering stencil onto your white card. Work the ink gently through the stencil design to build up colour on the floral motifs.

3

STAP 3 VAN 7

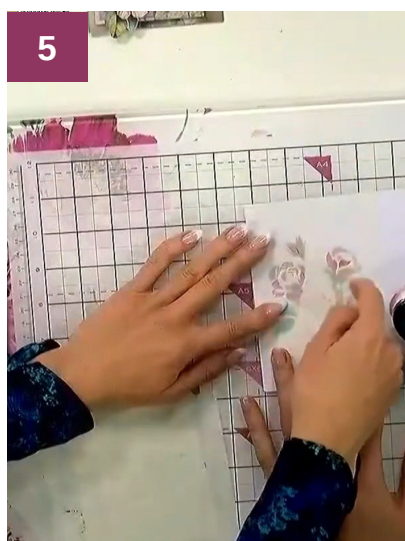

Remove the first stencil carefully. Position the second stencil in exactly the same spot on your card, aligning it precisely with the previous design.

STAP 4 VAN 7

Apply a different colour ink through your second stencil using a blending brush. Work the ink through the stencil design to build up the layered effect on your card panel.

STAP 5 VAN 7

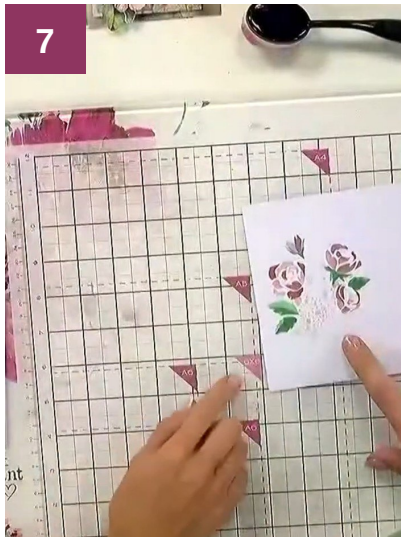

Continue layering with stencils three, four, five and six in the same position, changing to a different ink colour for each layer. Build up the design gradually, allowing the colours to blend and create depth.

STAP 6 VAN 7

Allow the ink to dry completely between layers. The floral design with pink roses and green leaves should be fully dry before proceeding to the next layer.

STAP 7 VAN 7

Position your final layered stencil design on the card to complete the multi-coloured embossed effect. The layers will create depth and dimension with the different colours showing through.

TIPS UIT DE SHOW

- Follow the numbered system on each stencil to ensure proper alignment.
- You don't need to use the splat stencil (usually the last one) if you prefer a cleaner look.
- You can use watercolour paints or felt-tip pens instead of ink pads if you prefer.
