

Embossing Folder Inked Card with Interference Wax Accent

EEN PROJECT UIT ONZE LIVESHOW - CREATE AND CRAFT TV - 12 SEPTEMBER 2024

OVER DIT PROJECT

Create an elegant floral card using an embossing folder to add beautiful texture and dimension to your card stock. Enhance the raised peony design with soft pink inks and add a touch of shimmer with interference wax for a sophisticated, multi-layered finish. This technique combines traditional embossing with modern colouring methods to produce a stunning handmade card perfect for any occasion.

STAP VOOR STAP

STAP 1 VAN 11

Select a cream or white card stock and place it on your craft mat. Choose an embossing folder with a floral or detailed pattern, such as peonies.

STAP 2 VAN 11

Ink both sides of the embossing folder with a pink or coral ink pad, pressing the pad into all the crevices to ensure complete coverage.

STAP 3 VAN 11

Place the inked card stock into the embossing folder, positioning it carefully between the two sides of the folder.

STAP 4 VAN 11

Run the embossing folder with your inked card through your die-cutting machine. This will emboss the design and transfer the ink simultaneously onto your card.

STAP 5 VAN 11

Remove the card from the embossing folder and examine the embossed peony design. The pink ink should highlight the raised areas of the floral pattern.

STAP 6 VAN 11

If the embossed colour is not dark enough, reposition the card in the embossing folder and run it through the die-cutting machine again to deepen the impression.

STAP 7 VAN 11

Apply a darker pink ink to the embossing folder. Run the card through the die-cutting machine again in the same position to add depth to the embossed design.

STAP 8 VAN 11

Turn the card over to reveal the debossed (recessed) side of the embossed design. If desired, apply ink to this reverse side using the same technique, working the pink ink over the cream cardstock to highlight the debossed floral pattern.

STAP 9 VAN 11

Once the embossed panel is dry, apply interference wax to the raised areas by gently rubbing it onto the embossed peony design. Work the wax into the raised details to create a subtle shimmer effect.

STAP 10 VAN 11

Hold the finished card up to the light to see the pearlescent interference wax shimmer and create a beautiful iridescent effect on the embossed floral design.

TIPS UIT DE SHOW

- You can emboss the same folder multiple times with different colours to build depth and richness.
- Both the embossed and debossed sides of the folder create beautiful effects; experiment with both.
- Interference wax adds a subtle, pearlescent shimmer that is especially visible when the card is held to the light.
