White Ink Highlight Technique on Embossed Design

EEN PROJECT UIT ONZE LIVESHOW - CREATE AND CRAFT TV - 8 JANUARI 2024

HET EINDRESULTAAT

OVER DIT PROJECT

Create a beautiful floral design on vellum featuring soft pink peonies and delicate green foliage. Using white pigment ink, you'll learn to soften and refine embossed areas, creating a gentle watercolour effect with subtle highlights that bring dimension to your work.

STAP VOOR STAP

STAP 1 VAN 5

Review your stencilled floral design and identify areas that appear too dark or need softening. Look for sections where the ink coverage is heavy and could benefit from white ink highlights to create dimension.

STAP 2 VAN 5

Place the same stencil back over the embossed design, carefully aligning it with the existing stamped floral image. Hold it firmly in place to ensure accurate positioning.

STAP 3 VAN 5

Load a clean blending brush with white pigment ink and tap off any excess on a scrap piece of paper.

STAP 4 VAN 5

Pounce the white ink through the stencil using gentle tapping motions. This will push back the darker colour and create highlights on the embossed floral design.

STAP 5 VAN 5

Carefully lift and remove the stencil to reveal the softened, highlighted floral design with the white ink creating a lighter, more delicate effect on the embossed image.

TIPS UIT DE SHOW

- White pigment ink is oil-based, so you can move it around and blend it even after application.
- If you're not happy with your stencilling result, you can always push it back with white ink rather than starting over.
