

Inked Bride and Groom Embossed Card with Watercolour Spray Effect

EEN PROJECT UIT ONZE LIVESHOW - CREATE AND CRAFT TV - 3 JANUARI 2024

OVER DIT PROJECT

Create a romantic wedding card featuring an elegant bride and groom design with a beautiful watercolour spray effect. Using a 3D embossing folder inked in soft pink tones and sprayed with water, you'll achieve a delicate watercolour wash background. Layer both the embossed and debossed sides of the design to add depth and dimension to your finished card.

STAP VOOR STAP

1

STAP 1 VAN 8

Using a sponge applicator, ink up the embossing folder with pale pink Distress Ink, applying it to the raised design areas of the folder.

2

STAP 2 VAN 8

Run the inked embossing folder through your die-cutting machine with white cardstock. This will create the embossed pattern on your card panel.

3

STAP 3 VAN 8

Spray the embossed design lightly with water using a spray bottle to create a watercolour effect. Hold the bottle at a distance and mist gently over the pink embossed image.

STAP 4 VAN 8

Run the embossing folder through the machine again with the design facing the opposite direction to create a debossed (indented) version of the image on the reverse side.

STAP 5 VAN 8

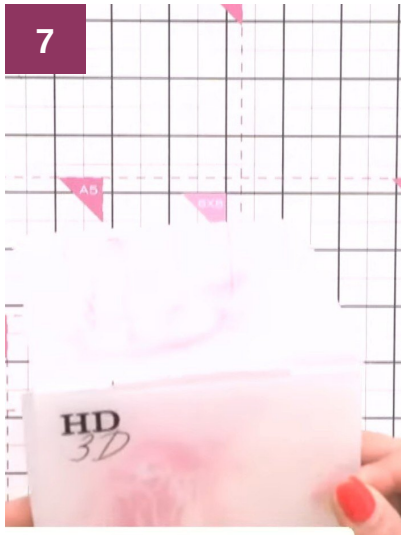

Ink up the embossing folder again using a darker raspberry pink ink pad on the reverse side to add more colour depth.

STAP 6 VAN 8

Lightly spray the darker inked card with water. Run the sprayed card through the embossing machine to create the embossed pattern.

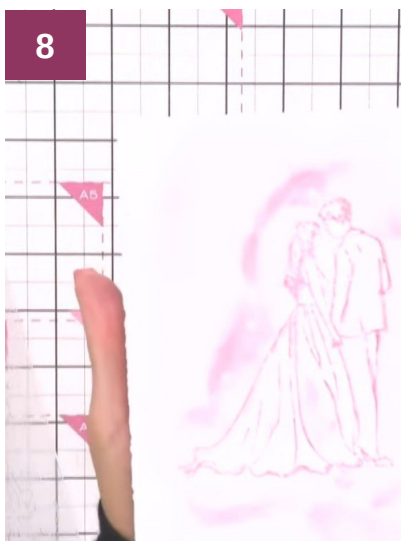

[BEKIJK DEZE STAP - 21:15](#)

STAP 7 VAN 8

Examine both sides of the embossed card to see the raised (embossed) and recessed (debossed) effects. Choose which side you prefer to use as the front of your card.

[BEKIJK DEZE STAP - 21:45](#)

STAP 8 VAN 8

Mount the embossed design onto your card base using adhesive. Position the embossed panel centrally on the card front and press down firmly to secure.

TIPS UIT DE SHOW

- You can reposition the design back in the embossing folder and run it through again if the colour is not dark enough or if you want to change it.
- Always go light with colour and add more rather than trying to pull colour back.
- The high definition embossing folders work through all die-cutting machines despite their extra dimension.
