

Gelaagde bierglaskaart met Quattro D

EEN PROJECT UIT ONZE LIVESHOW - HOBBYMAKER TV - 13 JULI 2026

HET EINDRESULTAAT

OVER DIT PROJECT

Create a sophisticated layered beer glass card using the Quattro D stencil system. This design features a realistic beer glass with golden tones and white foam, set against a decorative winter scene with pine cones and foliage. The four coordinating stencils layer together to build depth and dimension, making a professional-looking card that's surprisingly simple to achieve.

TIPS UIT DE SHOW

- Line up each stencil using the heart registration marks to ensure perfect alignment.
- You can change the colours to create different drinks—use different colour combinations for cocktails, colas or milkshakes.
- Do the die cutting before embossing to avoid flattening the embossed detail.
