

Embossed Black Card with Texture Paste and Metallic Accents

EEN PROJECT UIT ONZE LIVESHOW - CREATE AND CRAFT TV - 26 OKTOBER 2023

HET EINDRESULTAAT

OVER DIT PROJECT

Create a dramatic black card with an embossed winter landscape featuring churches and evergreen trees. Apply white texture paste over the embossed design to create a snowy, frosted effect, then add metallic ink highlights for extra dimension and sparkle. This striking monochrome card combines embossing, texture techniques, and metallic accents for an elegant seasonal design.

STAP VOOR STAP

1

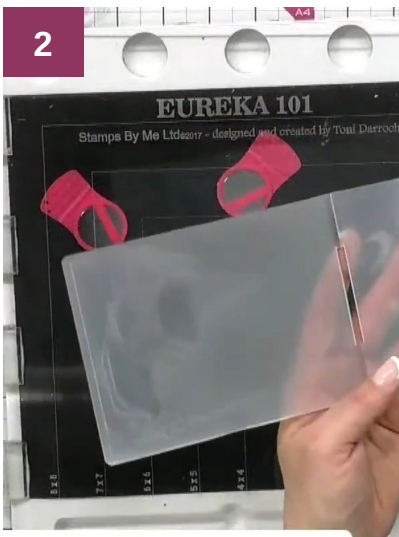

STAP 1 VAN 7

Open your embossing folder and feel the base with your fingers to identify which side creates the deboss (imprint) and which creates the emboss (raised texture). The base will have a slight raised area like a speed hump where the emboss pattern sits.

2

STAP 2 VAN 7

Run a piece of black card stock through your die-cutting machine using the embossing folder. Check your machine manufacturer's settings first to ensure the correct pressure for embossing.

3

STAP 3 VAN 7

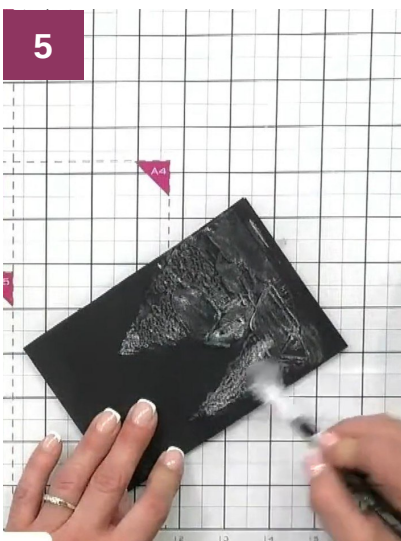

Examine the embossed design on the black card. The detail should be clearly visible despite the dark colour of the cardstock.

STAP 4 VAN 7

Apply white acrylic texture paste lightly over the embossed black card using a dry brush technique. Work with light strokes to create a subtle, snow-like effect without heavy coverage.

STAP 5 VAN 7

Build up the texture paste in layers across the embossed design, allowing each layer to create a snowfall effect. Work the paste into different areas of the card to add depth and dimension.

STAP 6 VAN 7

Once the white texture paste is dry, apply metallic acrylic paint over the textured surface using a brush or sponge, working the colour into the raised areas to add shimmer and dimension.

7

STAP 7 VAN 7

Add colour to the edges of the black card using ink pads to frame the embossed design. Choose colours that complement your metallic accents to create a cohesive finished piece.

TIPS UIT DE SHOW

- Always check your machine's manufacturer settings before embossing.
- Use stamp cleaner to wipe stamps after use, not regular wipes.
- You can mix embossing paste with glitter or gold for added effect.
