Secret Forest Christmas Card with Snow Drifts and Stamped Animals

EEN PROJECT UIT ONZE LIVESHOW - THE ART OF CARDISTRY - 24 OKTOBER 2023

HET EINDRESULTAAT

OVER DIT PROJECT

Create a charming Christmas card featuring a winter woodland scene with stamped deer and foliage against torn paper snow drifts. The design uses soft neutral tones with a teal border, layering white paper to create depth as the animals peek through the snowy landscape. Finish with white embossed details and colorless glitter for a subtle sparkle effect.

Adhere the vellum layer to the card front using a tape pen. Apply adhesive in random places around the edges and design to avoid visible adhesive showing through the translucent vellum.

TIPS UIT DE SHOW

- Tearing card forward creates a jagged edge perfect for snow effects.
- Use colorless glitter so it doesn't fight with your card design and looks like crushed glass when dry.
- Stamp animals at different heights and angles to create a natural woodland scene.
