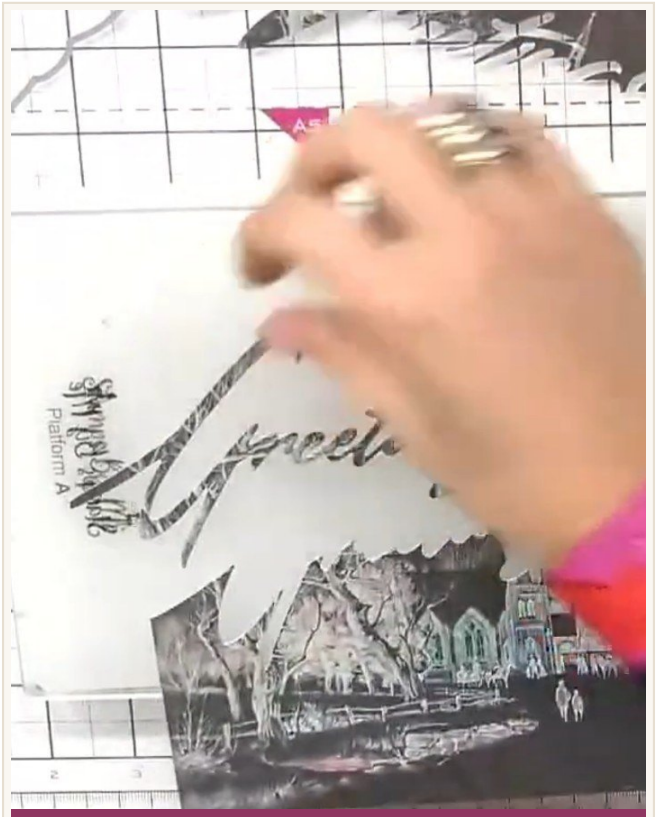
Floating Word Card with Patterned Paper Layers

EEN PROJECT UIT ONZE LIVESHOW - CREATE AND CRAFT TV - 16 OKTOBER 2023



HET EINDRESULTAAT

OVER DIT PROJECT

Make an elegant card with a split sentiment that appears to float across a scenic winter landscape. The 'Greetings' word is die-cut and separated into top and bottom sections, revealing the detailed black and white village scene beneath with touches of pink watercolour. This clever layering technique creates dimension and draws the eye through the card design.

TIPS UIT DE SHOW

- For a true floating effect, use acetate instead of white card for the word layer so it appears to float.
- This technique works beautifully with patterned papers that have visual interest.
