EEN PROJECT UIT ONZE LIVESHOW - FRIDAY START TO THE WEEKEND - 13 OKTOBER 2023

OVER DIT PROJECT

Create a vibrant three-dimensional poppy flower using a layering stencil system with traditional red colouring. The stencil guides you through multiple layers to build depth and dimension, resulting in a striking floral design that appears to leap from the card. This technique combines ink blending with precise stencil placement to achieve a beautiful botanical effect.

TIPS UIT DE SHOW

- You can add more colour to any layer by revisiting it with the same stencil if needed.
- The unevenness in ink application actually adds realism to the flowers rather than detracting from them.
- Rather than using a separate stencil for small details, use the pieces already included on the stencil itself.
