

## Petrolkleurige roos met de waterspraytechniek

EEN PROJECT UIT ONZE LIVESHOW - FRIDAY START TO THE WEEKEND - 13 OKTOBER 2023

### OVER DIT PROJECT

Create a beautiful teal-coloured rose arrangement with a soft, watercolour effect. Using layered stencils and a water spray technique, you'll blend inks to achieve an artistic, painterly finish. The result is a delicate floral design with subtle colour gradations and a dreamy, ethereal quality.

## STAP 4 VAN 8

**Apply a darker teal ink through the second stencil layer, pressing lightly to avoid over-saturation.** Use gentle pressure to build up the colour gradually without making the paper too wet.

## STAP 5 VAN 8

**Lightly spray water around the edges of the yellow stamped design to create a soft bleed effect.** The water will cause the ink to spread gently outwards for a watercolour appearance.

**BEKIJK DEZE STAP - 26:15**

## STAP 6 VAN 8

**Allow the water to work its magic and soften the ink naturally.** Let the water sit on the stamped image without disturbing it, allowing the colours to blend and create soft, organic effects.

**BEKIJK DEZE STAP - 26:30**

## STAP 7 VAN 8

**Position the third stencil layer over your design and apply the teal shade with blue undertones using a blending tool or sponge.** Build up the colour gradually to create depth and dimension in the rose design.

**BEKIJK DEZE STAP - 32:00**

## STAP 8 VAN 8

**Using green ink, add the final details to complete the foliage on your design.** Apply the ink to enhance the leaves and stems created with the rose branch stencil.

**BEKIJK DEZE STAP - 33:00**

## TIPS UIT DE SHOW

- Spraying water on the edges rather than the centre helps maintain some definition in the design.
- Ocean and Tiffany are two different teal colours—one has green undertones and one has blue undertones, creating different effects.
- You can revisit earlier stencil layers to bring back detail if the water spray has diluted the colour too much.
