Watercolour Stencil Resist Card with Bleached Stars and Hearts

EEN PROJECT UIT ONZE LIVESHOW - CREATE TOGETHER CLUB CHAPTER 3 - 3 OKTOBER 2023

HET EINDRESULTAAT

OVER DIT PROJECT

Create a stunning watercolour card featuring a vibrant blend of pink, purple, blue and peach inks with delicate bleached-out stars and hearts. This experimental resist technique uses reactive inks and water to lift colour through stencils, producing a beautiful semi-transparent, artistic effect on watercolour card. The result is a dreamy, galaxy-inspired design perfect for any occasion.

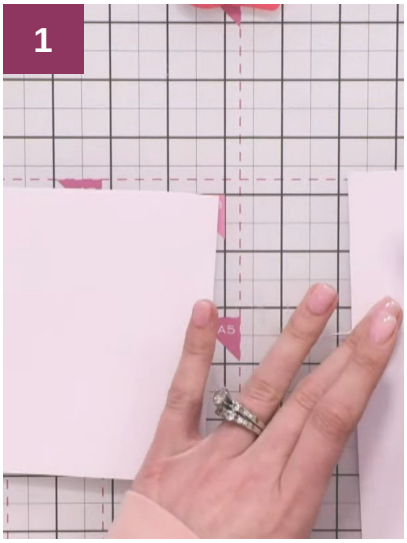
STAP VOOR STAP



STAP 1 VAN 8

Take a piece of scrap watercolour card stock. Ensure you're using watercolour card rather than chalk-based card, as the technique works best on watercolour stock.

STAP 2 VAN 8

Apply multiple colours of reactive, water-based ink randomly across the white card using a sponge applicator. Use brushstroke motions to blend the colours, covering the whole surface with pink and copper tones.

STAP 3 VAN 8

Spray the inked card lightly with water to activate and blend the watercolour inks together, creating a soft blended effect.

STAP 4 VAN 8

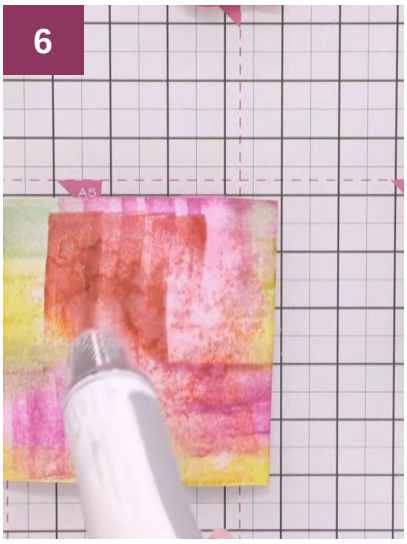
Position your stencil on top of the wet, inky card. Hold it in place with one hand whilst you work.

BEKIJK DEZE STAP - 27:15

STAP 5 VAN 8

Spray water directly onto the stencil whilst it's still in place on the card to help lift and blend the ink from underneath the stencil.

BEKIJK DEZE STAP - 27:45



STAP 6 VAN 8

Use a damp tissue to gently lift and bleach out the design through the stencil, creating a resist effect on the watercoloured background.

BEKIJK DEZE STAP - 28:00

STAP 7 VAN 8

Carefully remove the stencil from the watercolour background. Use a heat tool or allow the card to dry completely before proceeding to the next step.

BEKIJK DEZE STAP - 28:30

STAP 8 VAN 8

If the bleach effect is too subtle, use white paint or ink with a brush to enhance the stencilled stars and hearts, creating a faux bleached look with more contrast against the watercolour background.

TIPS UIT DE SHOW

- Use watercolour card stock for this technique, not chalk-based card, as chalk absorbs the ink and water too quickly and prevents the lift.
- Pre-wet the card with water before applying ink to help the colours activate and blend smoothly.
- If the bleach technique doesn't work as planned, you can recover the card by painting over the design with white to create a halo effect.
