

Sticky Emboss Powder Embossed Leaf Card

EEN PROJECT UIT ONZE LIVESHOW - CREATE AND CRAFT TV - 26 MEI 2023

OVER DIT PROJECT

Create a beautiful textured card featuring an elegant leaf design in warm copper tones with white embossed details. Using a sticky emboss powder technique with a heat tool, you'll achieve a stunning raised, dimensional finish that adds depth and sophistication to your handmade card. This technique combines embossing folders with emboss powder to create a professional-looking result with optional colour layering.

STAP 8 VAN 10

For a multi-coloured effect, apply a second emboss powder colour to a different area of the embossed card. Tap off the excess powder and heat emboss as before.

9

STAP 9 VAN 10

Heat set the embossing powder using a heat gun, moving it evenly across the card until the powder melts and fuses to create a raised, glossy finish.

10

STAP 10 VAN 10

Allow the embossed card to cool completely before handling. Set it aside on your craft mat whilst the heat gun cools the embossing powder.

TIPS UIT DE SHOW

- Emboss powders are inexpensive and will stretch your crafting to the next level.
- A little distress or imperfection in the sticky ink application can actually look better than a perfect finish.
- You can use different colours of emboss powder on the same card for a multi-toned effect.
