

Hibiscus Embossed Background with Watercolour and Ink Pad Technique

EEN PROJECT UIT ONZE LIVESHOW - CREATE AND CRAFT TV - 22 MEI 2023

OVER DIT PROJECT

Create a stunning textured background featuring elegant hibiscus flowers using an HD 3D embossing folder. White cardstock is embossed to reveal beautiful dimensional detail, then enhanced with metallic ink pads for a sophisticated, layered finish. This technique produces a striking floral design perfect for card making and mixed media projects.

STAP VOOR STAP

1

STAP 1 VAN 6

Check that the die plate is securely held in place with low-tack tape on your Dainty Hibiscus embossing folder before use.

2

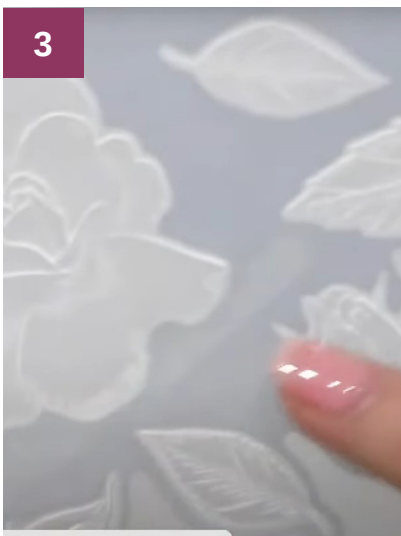

STAP 2 VAN 6

Place your white cardstock into the die-cutting machine with the embossing folder and die plate positioned so the die faces forward. Run it through the machine to emboss the design and cut out the panel.

**STAP 5 VAN 6**

Take a metallic ink pad (such as gold or silver) and gently brush or swipe it over the raised embossed areas of your design to highlight the detail.

BEKIJK DEZE STAP - 17:15

**STAP 6 VAN 6**

Apply the ink pad lightly to the embossed design, using gentle pressure to avoid flattening the 3D texture. This allows the raised detail to show through with dimension.

TIPS UIT DE SHOW

- The HD 3D technology has dimension on both the front and back of the embossing folder, so detail will show from both sides.
- You can remove the die plate by gently peeling away the low-tack tape if you want to use just the embossing folder as a background without cutting out individual pieces.
