

Embossed Floral Card with White Ink and Sparkle...

23 MARCH 2026

Create an elegant card using a high-definition 3D embossing folder with white ink, embossing powder, and optional sparkle accents. The technique produces a dimensional floral design with subtle iridescence that elevates the card from simple to sophisticated.

TIPS FROM THE SHOW

- Always use an anti-static bag before heat embossing to remove moisture and prevent unwanted sparkle floating on your card.
- Embossing powder will only stick to pigment ink pads and sticky embossing inks, not dye-based inks.
- The emboss is as beautiful as the deboss on these high-definition folders, so both sides of the design are worth showcasing.
