

Layered Hellebore Flower Card with Embossed...

8 SEPTEMBER 2026

Craft a beautiful card showcasing the delicate hellebore flower with its pre-printed, double-sided paper that creates realistic shading without colouring. Layer the die-cut flowers with coordinating leaves and optional 3D centres for a sophisticated botanical design.

WHAT YOU WILL NEED

See the show for everything used.

Select a coloured paper from the hellebore collection that appeals to you, noting the pre-printed shading and veining on both sides.

Watch this step: 22:45 into the show

Place the connected die set onto your die-cutting machine, ensuring the paper is positioned correctly with the printed side facing up.

Watch this step: 23:00 into the show

Run the die set through your machine in one pass to cut all three flower sizes and the accompanying leaves simultaneously.
Watch this step: 23:15 into the show

Pop out all the cut pieces from the carrier sheet, revealing the double-sided printed flowers and leaves.
Watch this step: 27:30 into the show

Layer the three flower sizes together, starting with the largest, then medium, then smallest, using a small spot of glue in the centre.
Watch this step: 28:45 into the show

Position the two leaves beneath the layered flowers, angling them naturally to frame the bloom.
Watch this step: 29:00 into the show

Add the optional 3D centre piece by rolling the small sprigly element and securing it in the flower's centre with glue.
Watch this step: 29:15 into the show

Adhere the completed flower cluster to your card base, positioning it as a focal point or in clusters as desired.
Watch this step: 32:00 into the show

TIPS FROM THE SHOW

- The double-sided printed paper eliminates the need for colouring, as the pre-printed shading creates realistic depth and dimension.
- The connected die system means all pieces stay together, preventing loss of small elements.
- You can interchange leaves from different flower sets if you own multiple collections to create varied designs.
