19 JUNE 2026

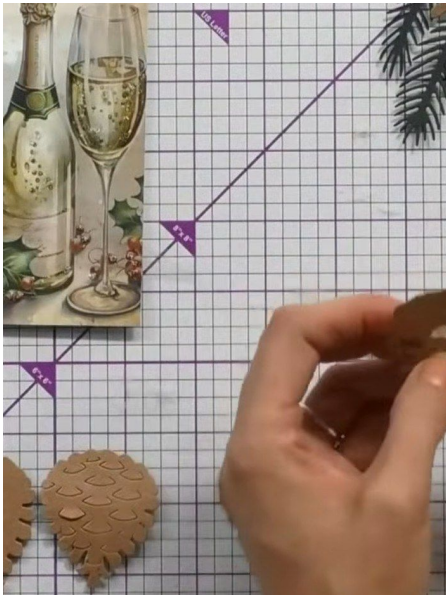

Create a realistic three-dimensional pine cone using layered die-cut pieces in natural kraft tones. The pine cone features multiple embossed layers that are shaped and lifted to create authentic texture and depth, adorned with festive holly leaves and berries. This dimensional embellishment is perfect for adding a seasonal touch to cards, gift boxes or festive decorations. #### TIPS FROM THE SHOW

- You can create pine cones in any colour by using alcohol markers, watercolours, or ink pads to colour the die cuts before assembly.
- Swipe an ink pad directly onto the die cut before cutting to create light and shade effects without blending.
- Don't be tight with embellishments—use multiple pine cones and fillers to create a full, pretty arrangement.
